

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL

Fund Services

ACUMEN Portfolio 3 X

A Sub-fund of the Acumen OEIC (ISIN Accumulation: GB00BZ3T3D26)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to increase in value, over a minimum of 5 years, by investing in a range of asset classes and global markets. The Fund will do this through a combination of capital growth, which is profit on investments held, and income, which is money paid out of investments such as dividends from shares and interest from bonds.

The Fund will be actively managed, which means the Investment Manager decides which investments to buy and sell, and when, on a low risk strategy. The Fund will aim to maintain a risk rating classification of 3. This risk classification is based on a range the Investment Manager maintains from 1 (lowest risk) to 10 (highest risk).

At least 80% of the Fund will be invested in exchange traded funds (ETFs), which typically track an index. Through these ETFs the Fund will gain exposure to a range of asset classes across different industries and geographical regions including:

Between 65% and 100% in bonds and cash. Up to 35% in shares of companies. Up to 15% in 'alternatives', such as property, commodities (for example gold and oil) and regulated funds employing a hedge fund type strategy. Up to 35% in shares of companies. Up to 15% in 'alternatives', such as property, commodities (for example gold and oil) and regulated funds employing a hedge fund type strategy.

The Fund may also be exposed to other asset classes including, money market instruments (which are short term loans) and other permitted investments,

although this is expected to be minimal. Bonds, which are loans typically issued by companies, governments and other institutions, may be either investment grade, where the issuer has a high and reliable capacity to repay the debt, or sub-investment grade, which can be more vulnerable to changing market conditions but typically pay a higher rate of interest. Up to 20% of the Fund may be held directly in cash or money market instruments, or in other types of funds. The Fund may invest in funds operated by the Investment Manager, ACD or its associates.

The Fund may use derivatives (instruments whose returns are linked to another asset, market or other variable factor) to reduce risk in the Fund (also known as hedging) and for investment purposes, in order to help the Fund meet its investment objective. The Fund will not always hold these instruments however at times they may be held for extended periods. ETFs and other funds purchased will also have the ability to use derivatives to varying degrees.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics. The Fund's investment policy puts it in the IA Mixed Investment 0-35% shares sector. You may want to assess the Fund's performance compared to the performance of this sector.

Income is not distributed but is rolled up (accumulated) into the value of your investment.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested. This Fund has been measured as 4 because its investments have experienced moderate volatility in the past. The Fund's volatility is affected by various risks, including:

- The Fund has exposure to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality. When interest rates rise, bond values generally fall. This risk is generally greater for longer term bonds and for bonds with perceived lower credit quality.
- The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of your investment.

- In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner. In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended.

Risks which are not adequately captured by the risk indicator include:

- The insolvency of any institution providing services, such as safekeeping of assets or holding investments with returns linked to financial contracts (known as derivatives), may expose the Fund to financial loss.
- The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund's assets or to reduce the costs of investing, although this may not be achieved.
- Dividends paid by companies are not guaranteed and can be cancelled, which may impact the Fund's ability to deliver an income to investors.

A more detailed description of the risks that apply to this Fund can be found in the Fund's prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 30/04/2021. From 30 April 2021, the Ongoing Charge calculation has been extended to include, where relevant, charges incurred by closed-ended vehicles such as investment trusts. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see Sections 24 - 26 of the Fund's Prospectus, which is available at www.ifsfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	1.13%
------------------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
------------------------	------

Past Performance

Historic performance to 31 December 2020

	2016	2017	2018	2019	2020
■ Fund	-	-	-2.8	5.8	0.5
■ Benchmark	-	-	-3.4	8.8	4.0

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this share class is calculated in GBP.

This Fund was launched on 1 June 2017

This share class was launched on 1 June 2017

Benchmark: IA Mixed Investment 0-35% Shares.
